

NEW!

Koolkut KF vertical panel saws

- Easy to use, accurate and attractively priced
- Compact moving-column design saves space
- Robust, heavy steel frame delivers long life and accuracy
- Plunge and bevel cutting
- Single phase 240V or 110V supply
- Easy wall or floor fixing
- Rapid switching from cross to rip cut
- Variable motor speed control

THE RIGHT SIZE KOOLKUT KF FOR YOU

| | KF12 | KF16 | KF21 |
|----------------------------|---------------------------------|------------------------|------------------------|
| Capacity mm (inches) | 2500 x 1250 (98 x 49) | 3100 x 1600 (122 x 63) | 3100 x 2100 (122 x 83) |
| Cut depth mm (inches) | 56 (2.2) @ 90° - 40 (1.5) @ 30° | | |
| Length mm (inches) | 3339 (132) | 3940 (155) | 3940 (155) |
| Height mm (inches) | 1934 (76) | 2276 (90) | 2765 (109) |
| Depth mm (inches) | 751 (30) | 818 (32) | 922 (36) |
| Power kW (hp) | 1.6 (2.2) | | |
| Blade diameter mm (inches) | 210 (8.25) | | |

compact versatility • precision engineering • tempting prices

Cutting sheet materials in a smaller workshop: the challenge

Smaller operations have traditionally cut sheet materials with table saws or even hand-held saws and trestles. These approaches have serious limitations: both require extensive floor space, cutting larger sheets on a table saw typically involves two or more operators working together, successful cutting of thin, flexible materials is challenging, and the safety risks associated with portable and table saws are well known.

While many such users know that the solution to all of these problems is a vertical panel saw, these machines have typically been too expensive for smaller operations.

The answer: the new Koolkut KF range

The Sagetech Koolkut KF range is ideal for those who require a heavier duty unit than the Zapkut ZM range, but do not require the greater accuracy or workload capacity of the Koolkut KK saws.

Every Koolkut KF vertical panel saw comes comprehensively equipped with quick-stops for rapid, precise dimensioning, mid-height supports for fast, accurate cutting of smaller panels, and plunge and bevel cutting capability to 30°.

Bringing together the proven design philosophy of the Zapkut ZM range and the robust Koolkut KK frame, the KF range is built using the most advanced manufacturing techniques available. The result is an attractively-priced, robust and accurate workhorse.

Cross cutting

Rip cutting

Applications

The Koolkut KF is ideal for a wide variety of organisations, including:

- Smaller workshops with limited cutting requirements or budgets
- Shop, office, kitchen and bathroom fitters
- Signmakers and others using off-cuts from pre-cut material

Find out more

To find out more about Sagetech's Koolkut KF range of vertical panel saws, and how they could help you:

Visit our website: www.verticalpanelsaw.co.uk

Call us: +44 (0) 118 970 1950

Email us: info@sagetech.co.uk

Your local distributor is:

All goods are supplied subject to our standard terms and conditions of sale. These are available on request, or from www.sagetech.co.uk.

All Koolkut vertical panel saws are supplied with a twelve month warranty on all parts, and a twelve month parts and labour warranty on the sawhead motor. The sawhead motor warranty can be extended to three years by returning the warranty card, correctly completed.

Delivery: To avoid damage and to reduce transit costs, the machines are supplied crated with the frame disassembled. This also makes manual off-loading possible, and allows the Koolkut to be installed in even restricted access areas. All Koolkuts are pre-aligned during manufacture, but final alignment trimming may be required during installation to optimise cut accuracy. Sagetech can put you in contact with an engineer who can carry out the installation for you, but cannot be party to any contract.

Specifications subject to change without notice.
