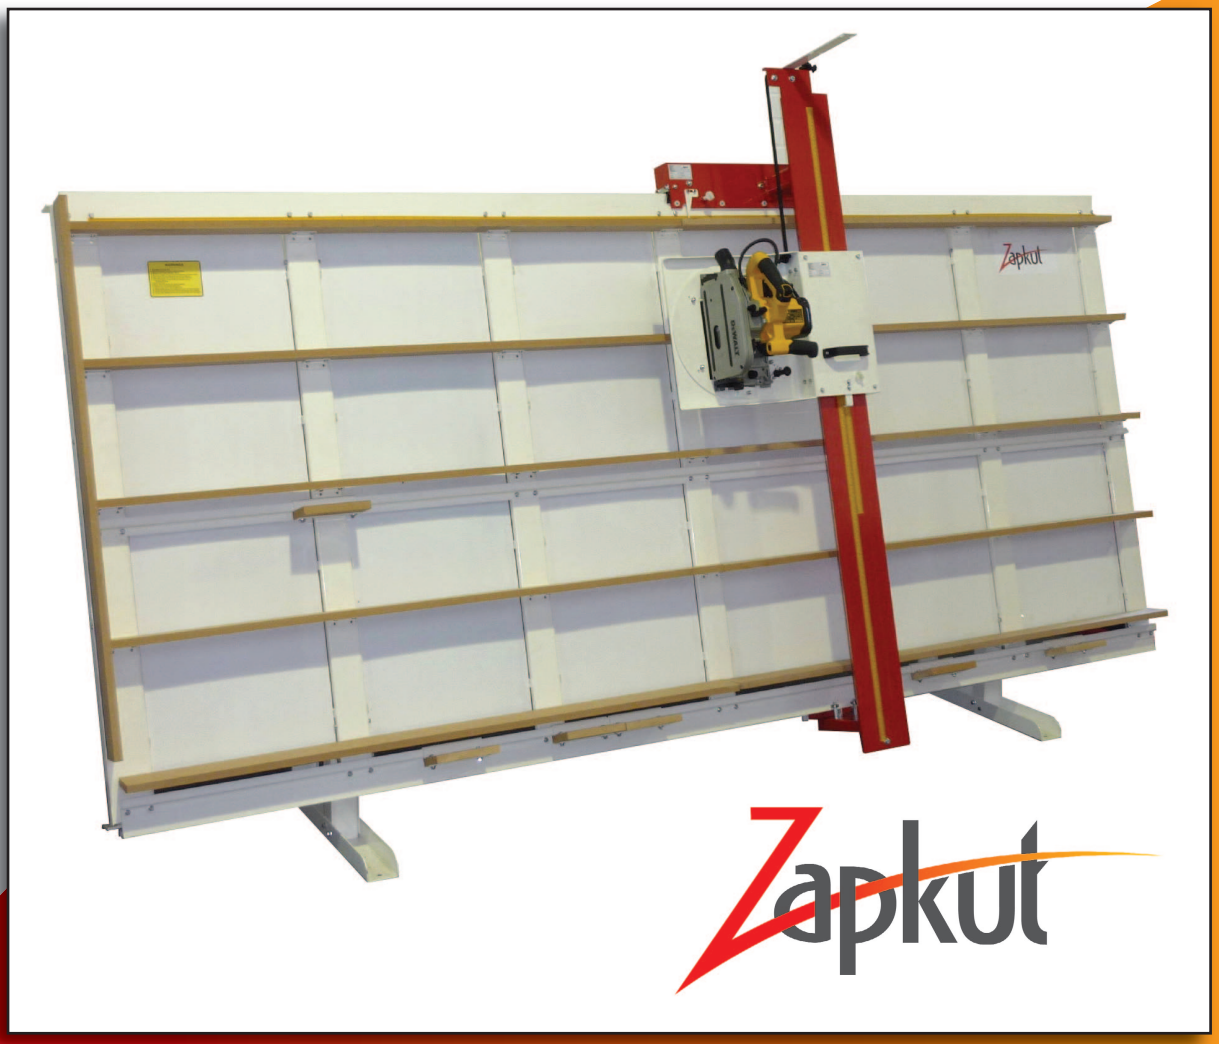
sheet cutting solutions



Zapkut

Zapkut ZM vertical panel saws

- Easy, accurate and highly affordable
- Compact moving-column design
- Depth control
- Plunge and bevel cutting
- Rapid switching from cross to rip cut
- Router head option
- Variable motor speed control

THE RIGHT SIZE ZAPKUT ZM FOR YOU

	ZM12	ZM16	ZM21
Capacity mm (inches)	2500 x 1250 (98 x 49)	3100 x 1600 (122 x 63)	3100 x 2100 (122 x 83)
Cut depth mm (inches)	38 (1.5)		
Length mm (inches)	3100 (122)	3600 (142)	3600 (142)
Height mm (inches)	1914 (75)	2205 (87)	2645 (104)
Depth mm (inches)	700 (28)	750 (30)	800 (32)
Power kW (hp)	1.2 (1.6)		
Blade diameter mm (inches)	160		

compact versatility • precision engineering • tempting prices

Cutting sheet materials in a smaller workshop: the challenge

Smaller operations have traditionally cut sheet materials with table saws or even hand-held saws and trestles. These approaches have serious limitations: both require extensive floor space, cutting larger sheets on a table saw typically involves two or more operators working together, successful cutting of thin, flexible materials is challenging, and the safety risks associated with portable and table saws are well known.

While many such users know that the solution to all of these problems is a vertical panel saw, these machines have typically been too expensive and bulky for smaller operations.

The answer: the Zapkut ZM range

Sagetech's Zapkut ZM moving-column vertical panel saw has been designed specifically for the smaller operation requiring a compact, safe and highly economical sheet-cutting solution.

Zapkut ZM vertical panel saws are available in three sizes, all of which make fast, accurate sheet cutting a simple, one-person job. No more wrestling with rails and trestles and no more horizontal handling of heavy, unwieldy sheets: just lift the sheet onto the vertical frame, engage cross or rip cut as required, set the sawhead to the required dimension, and cut.

Designed and manufactured using state-of-the-art technologies and processes, Zapkut ZM saws are robust and hard wearing. They deliver smooth, accurate cutting with excellent cut quality on a wide range of non-ferrous materials, including timber and timber-based products, acrylics, aluminium composites and solid aluminium.

If you are looking for a robust, accurate, low-cost panel saw, the Zapkut ZM is the machine for you.

Cross cutting

Rip cutting

Applications

The Zapkut ZM is ideal for a wide variety of tradespeople, including:

- Shop, office, kitchen and bathroom fitters
- Smaller workshops with limited cutting requirements or budgets
- Signmakers and others using off-cuts from pre-cut material

Find out more

To find out more about Sagetech's Zapkut ZM range of vertical panel saws, and how they could help you:

Visit our website: www.verticalpanelsaw.co.uk
Call us: +44 (0) 118 970 1950
Email us: info@sagetech.co.uk

All goods are supplied subject to our standard terms and conditions of sale. These are available on request, or from www.sagetech.co.uk.

Your local distributor is:

All Koolkut vertical panel saws are supplied with a twelve month warranty on all parts, and a twelve month parts and labour warranty on the sawhead motor. The sawhead motor warranty can be extended to three years by returning the warranty card, correctly completed.

Delivery: To avoid damage and to reduce transit costs, the machines are supplied crated with the frame disassembled. This also makes manual off-loading possible, and allows the Koolkut to be installed in even restricted access areas. All Koolkuts are pre-aligned during manufacture, but final alignment trimming may be required during installation to optimise cut accuracy.
Sagetech can put you in contact with an engineer who can carry out the installation for you, but cannot be party to any contract.

Specifications subject to change without notice.
